STRUCTURAL MECHANICS

TEXTBOOK

Recommended by Education Board
of Rostov State University of Transport Communication
as a textbook for teaching the students
in “Transport Construction” branch of trade education

• PROSPECT •

Moscow
2009

UDC 624.04(075.8)

Reviewers: Dr. of Engineering, Prof. Scherbak P.N. (Rostov State University of Transport Communication); Dr. of Engineering, Prof. Derushev V.V. (Rostov Military Institute of Rocket Forces); Dr. of Engineering, Prof. Tkachev V.A. (Shahty College of Platov South-Russian State Polytechnic University)

Rusakov A.I.

Structural Mechanics: Textbook. – M.: Prospect, 2009.

ISBN 978-5-392-00436-2

The textbook has been written in accordance with State Educational Standard of 2000 for teaching the specialist in line of transport construction. It includes a lecture course, the design tasks with patterns of execution, and the laboratory-based work series of computer simulation in ANSYS environment. The lecture course includes theoretical basics of elastic system strength analysis, the theory of buckling and structural dynamics.

CONTENTS

Introduction	5
------------------------	---

Part I. LECTURE COURSE

Lecture 1. Kinematic Analysis Basics in Structural Mechanics	6
Lecture 2. Movable Loads on a Beam	14
Lecture 3. Theoretical Basics of Calculations via Influence Lines	19
Lecture 4. Arches: General Info and Diagrams of Stresses	24
Lecture 5. Three-Hinged Arches under Live Static Load	31
Lecture 6. Hinged Beams	37
Lecture 7. Preliminaries for Trusses	45
Lecture 8. Internal Forces in Statically Determinate Trusses	55
Lecture 9. Influence Lines for Stresses in Trusses	64
Lecture 10. Space Statically Determinate Trusses	74
Lecture 11. Energy Approach Foundations of Displacement Analysis for Elastic Systems	83
Lecture 12. Constraint Reactions in Elastic Systems	91
Lecture 13. Theoretical Basics of Force Method	99
Lecture 14. Simplification Ways of Statically Indeterminate System Analysis	107
Lecture 15. Force Method in Case of Temperature Exertion and Displacements of Supports.	116
Lecture 16. Force Method in Influence Lines Construction and Space System Analysis	122
Lecture 17. General Info about Displacement Method	130
Lecture 18. Displacement Method in Applications	137
Lecture 19. Finite Element Method in Elastic Body Mechanics	145
Lecture 20. Theoretical Basics of Structural Stability Investigations	157
Lecture 21. Methods of Structural Stability Analysis	164
Lecture 22. Investigation of Frame Buckling Using Displacement Method	174
Lecture 23. Free Oscillations of Systems with One Degree of Freedom	184
Lecture 24. Dynamic Factor and Problem of Deducing the Eigen Frequencies	194
Lecture 25. Exerted Oscillations of Finite-Degree-of-Freedom Systems	205
Lecture 26. Bending of Thin Rigid Plates	214

Part II. PROBLEMS AND DESIGN TASKS

1. Statically Determinate Systems	222
1.1. Problems	222
1.2. Tasks for Design Work No.1	233
Task 1. Hinged Arch Analysis	233
Task 2. Plane Truss Analysis	235
1.3. Patterns of DW No.1 Execution	240
1.3.1. Pattern of Hinged Arch Analysis	240
1.3.2. Pattern of Plane Truss Analysis	248
2. Statically Indeterminate Systems	260
2.1. Problems	260
2.2. Tasks for Design Work No.2	270
Task 1. Frame Analysis by Force Method	270
Task 2. Influence Lines Construction by Force Method	273
Task 3. Frame Analysis by Displacement Method	273
2.3. Patterns of DW No.2 Execution	277
2.3.1. Pattern of Frame Analysis by Force Method	277
2.3.2. Influence Lines Construction by Force Method	283
2.3.3. Patterns of Frame Analysis by Displacement Method	293

Part III. LABORATORY-BASED WORKS

1. Work No.1. FEM Simulation of Hinged Truss	301
--	-----

1.1. Task	301
1.2. Pattern of Report	308
1.3. Instruction to Laboratory Work No.1 in ANSYS Environment	311
2. Work No.2. FEM Simulation of No-Hinged Arch	320
2.1. Task	320
2.2. Pattern of Report	321
2.3. Methodical Recommendations to Work No.2	326
2.4. Instruction to Laboratory Work No.2 in ANSYS Environment	329
3. Work No.3. FEM Simulation of Frame	337
3.1. Task	337
3.2. Pattern of Report	343
3.3. Methodical Recommendations to Work No.3	346
3.4. Instruction to Laboratory Work No.3 in ANSYS Environment	348
Supplement. Normative Live Vertical Load from Rolling Stock	352
Bibliography	353
Subject Index	355
